

Radio controlled sockets

For easy changeover and retrofitting to SOMMER radio control

Even if your existing devices are not fitted with radio control the changeover is simple and fast with the SOMMER radio controlled socket or receiver.

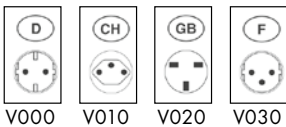

Radio controlled socket (for domestic appliances)

A radio receiver which switches the supply voltage to an application, e. g. a lamp, on and off. It is possible to switch the light on with one button of the transmitter and switch it off with another button.

antenna: integrated
memory: 112 programmable radio codes
switching output: single pole switching, max. 3,500 Watts, max. 16 A, resistive load
area of application: dry and fully enclosed rooms
dimensions: 138 x 54 x 40 mm
operating method: switching mode; relay can be switched on/off via radio

Radio controlled socket FM 868.8 MHz: item no. 7017V000

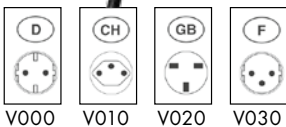

Radio controlled socket FM 434.42 MHz: item no. 7018V000

Conversion socket receiver

This radio receiver simply plugs between power outlet and operator. The radio signal to start the operator is transferred to the push-button input of the operator by a 1.5 m long cable. This makes it easy to equip non-SOMMER operators with SOMMER radio controls, or to change the radio frequency. No installation work on mains necessary! Please keep in mind that not the power outlet, but the start signal is switched.

antenna: integrated
memory: 112 programmable radio codes
output socket: plug with earthing-contact, 16 A, AC 230 V, 50 Hz
area of application: dry and fully enclosed rooms
dimensions: 138 x 54 x 40 mm
operating method: pulse mode; relay picks up as long as the radio signal is sent

Conversion socket receiver

FM 868.8 MHz:
item no. 7021V000

FM 434.42 MHz:
item no. 7022V000

With a SOMMER handset you can control your appliances from the comfort of your living room.
